PROFESSIONAL SUMMARY

An eager to learn software developer, just graduated from my coding bootcamp and very excitingly looking to launch my new career in coding. With years behind me full of diverse experiences ranging from electrical engineering to sales & marketing roles. I have a passion for learning new things and for solving problems.

Languages:

Front End Development: HTML5, CSS3, JavaScript, React, jQuery, Python
Back- End Development: Node.js, Express, MongoDB, Mongoose, Django

Projects

- Team Data – https://moeabraham.github.io/module-1-proj/
  That was my first solo project using JS, HTML5, CSS3 that Allows the user to search his favorite soccer team to acquire data regarding the team
- Activity-Tracker – https://activity-project-unit.herokuapp.com/
  First time using the MERN stack to create an activity themed to-do list, deployed on Heroku
- Music Data – https://musicdata.netlify.appp/
  Working with React and mognoDB to create a music library for the user to save his favorite tracks data, while using firebase Authentication so user can have his own personalized experience
- Moov-app – https://cfc-moov.herokuapp.com/
  First team project & graduation project, Using python and Django to create a mobile themed app that allows the user to upload a floor plan and create a real time scaled furniture list that he can drag and drop to visualize his new space
